Mission of Office of Institutional Research and Planning:

The mission of the Office of Institutional Research & Planning is to increase University effectiveness by providing and promoting information to enhance understanding of the institution.

Graduation Rates are an essential component of NPS' system of measuring student achievement. NPS' Graduation Rates are calculated based on the actual number of students who graduated divided by the total number of students enrolled within a particular cohort. A cohort is defined as a group of students who started a curriculum in the same academic year. Graduation rates are at two, three and five years out for a cohort.
